

HIGH SECURITY FENCE

High Security Fence, also called 358 fence, which is well-known as anti-climb & anti-cut through barrier. As a security fence, using high quality carbon steel wire to weld a fence panel, it can provide privacy in some extent. High Security Fences are used to give enduring and secure protection for the public buildings, commercial properties etc. High security fence can also be worked with electric alarm, detection systems (no blind spots for CCTV) etc. It is also widely used in military, airports, prisons etc.
